MATEUS FURTADO CURY

GO-TO-MARKET STRATEGY & OPERATIONS · AI-FIRST OPERATOR

São Paulo, Brazil · (12) 99737-3769 · mateuscury@gmail.com · linkedin.com/in/mateuscury · mateuscury.github.io · Portuguese • English • Spanish (fluent)

SUMMARY

Go-to-Market Strategy & Operations operator with 6+ years building the automations, dashboards, and standardized processes that scale revenue across high-growth technology companies — most recently at Meta and TikTok. I break ambiguous problems down from first principles and own them end to end: from SQL against core revenue tables, through experimentation and benchmarking, to production tooling that sales, data, and product teams adopt. An AI-first operator by default — I use AI across the whole workflow (analysis, insight generation, and building shipped tools), and have designed, built, and launched a live consumer product end to end with AI.

PROFESSIONAL EXPERIENCE

Meta — Sales Strategic Planning & Operations Lead

São Paulo · North America · Jul 2025 – Present

- Trusted advisor to Meta Sales stakeholders — turned SQL-driven analysis of revenue, pipeline, and market data into executive recommendations on territory design, resource allocation, and planning.
- Designed and shipped **10+ HTML one-pagers and reports/dashboards — built AI-driven end to end** (SQL → analysis → production tool) to answer business needs quickly and help steer strategy, giving teams real-time visibility into revenue, productivity, and pipeline.
- Built **AI-first operational tooling and automations**: a rule-based insights engine (concentration-risk, efficiency-gap, growth signals) with LLM-driven narrative injection, plus a reusable query → inline → deploy refresh pipeline that eliminated manual data collection.
- Standardized go-to-market process as LATAM champion for a new CRM-driven sales workflow — drove adoption toward a 100% target and connected automated data feeds that removed manual reporting steps.
- **Converted from contract to full-time employee**, now covering two of Meta's largest North America territories — scaling the analytical infrastructure I built into the company's largest market.

ByteDance / TikTok — Monetization & Strategy Ops Manager, LATAM SMB

São Paulo · Jul 2022 – May 2025

- Owned monetization strategy and revenue operations across Brazil, Mexico, Colombia, and Argentina, growing a **$160M+ annual portfolio by 145% YoY** through performance models, territory optimization, and data-driven resource allocation.
- Designed and ran a strategic BPO vendor program — coverage logic, account-assignment, and performance tracking — lifting active advertiser (lead-to-active) rate by **50%** and driving **~15% vendor revenue uplift**.
- Redesigned the operating model — restructured headcount and rebalanced workload for a **30% productivity gain** while holding service quality.
- Led a cross-functional business-transformation program (CNPJ verification) across product, tax, risk, legal, and business — **reduced fraud 50%** without impacting onboarding.
- Built agency-facing dashboards and performance models (SQL, Looker, Metabase, Python) tracking conversion funnels, pipeline health, and productivity KPIs.

ByteDance / TikTok — Sales Operations Specialist, Productivity & Efficiency

São Paulo · Jul 2021 – Jul 2022

- Administered **R$20M+** in quarterly agency rebate programs — built compliance and tracking frameworks that reduced discrepancies and improved partner satisfaction.
- Developed the first LATAM-specific sales dashboards, providing granular funnel visibility by segment, channel, and territory; cut non-sales activity ~50% through streamlined reporting processes.

Escale Digital — Sales Operations Specialist

São Paulo · 2019 – 2021

Sales operations analytics for a digital marketing consultancy. Built **P&L-style revenue and cost reporting** by business line — gathering data from multiple sources, forecasting revenue, and giving leadership a clear view of resource allocation and which lines drove results. SQL reporting and funnel analysis across B2B client portfolios.

QuintoAndar — Sr. Operations Analyst

São Paulo · 2018 – 2019

Operations analytics for Brazil's largest proptech. Designed a third-party incentive and rate structure that **cut external costs ~10%** while lifting partner performance, and built the SQL dashboards and cost benchmarks behind it.

BEYOND THE DAY JOB — AI-FIRST BUILDING

- **M2CERTO** (m2certo.com.br) — conceived, built, and launched a live, consumer-facing real estate data platform end to end with AI. A working proof of the AI-native approach I bring to operations.
- **AgoraZ** — prototyped a WhatsApp conversational-commerce agent; cut per-conversation cost from **R$1.84 to R$0.84 in testing** through model and workflow design.

EDUCATION

- **MBA**, Fundação Getúlio Vargas (FGV)
- **BSc. Industrial Electrical Engineering**, Universidade Federal de Santa Catarina (UFSC)
- **Data Science & Analytics**, MIT xPRO (Professional Certificate)

SKILLS

AI-First Approach: AI-native workflow design across analysis, insight generation, and tooling; prompt engineering and LLM API integration; rule-based insights engines; built and shipped a live consumer product end to end with AI

Revenue / GTM Operations: E2E process design & standardization, sales/automation tooling, pipeline & funnel analytics, territory & coverage design, KPI/reporting frameworks, experimentation, CRM workflow adoption, vendor program management

Data & Analytics: SQL (Presto, DaiQuery), Python, Looker, Metabase, Chart.js / interactive dashboards, BI & data visualization, cost & market benchmarking

Finance-Literate: P&L-style revenue/cost reporting, unit-economics modeling, resource-allocation and headcount/cost analysis across $160M+ portfolios (MBA, FGV)

Ways of working: first-principles problem-solving, high-velocity autonomous execution, cross-functional collaboration, executive advisory & stakeholder management

Languages: Portuguese • English • Spanish (fluent)
